[My portfolio](#)

## PROFILE

Passionate software engineer from Hungary to Canada, driven by a love for technology and innovation. Self-taught from a young age, I developed a financial spreadsheet that evolved into a robust multi-currency financial management product. With a background in engineering management and hands-on experience in sales to enhance my communication skills, I'm now eager to contribute my diverse expertise to cutting-edge software development projects.

## SKILLS

**Front-End:** JavaScript, AngularJS, React.js, HTML5, CSS, Sass, Bootstrap, Tailwind, Document Object Model DOM, APIs

**Back-End:** JavaScript, TypeScript, PHP, Symfony, Node.js, Express.js, REST APIs, Web APIs, User Authentication, Auth, AWS Cognito

**Databases:** MySQL, PostgreSQL, AWS DynamoDB

**Testing:** Jest, Enzyme, Vitest

**Deployment & Development**

**Tools:** GitHub, Docker, Heroku, WebPack,

**Other:** Jira, AWS Lambda, Clear Communication, Teamwork, Collaboration, Problem Solving

## EXPERIENCE

### Full Stack Developer | [Secondly](#)

JULY 2023 - PRESENT, VANCOUVER, BC (REMOTE)

- Enhanced the website's front-end by integrating Bootstrap, resulting in a more responsive and visually appealing user interface
- Led the development of a negotiation system using PHP with the Symfony framework, improving operational efficiency

### Full Stack Developer | [Square21 Software and Technology](#)

JAN 2023 - JUNE 2023, VANCOUVER, BC (REMOTE)

- Designed and developed REST APIs and endpoints using Typescript, and TRPC, optimizing data retrieval processes
- Developed, and maintained automated tests using Jest.
- Collaborated with designers and product managers to deliver user-centered software solutions on time.

### Junior Developer | [SiteMax Systems Inc.](#)

MAY 2022 - JUNE 2022, VANCOUVER, BC

- Constructed Flex Forms for over 15 clients using JavaScript with Angular.js, enhancing user interaction
- Resolved critical issues in the front-end code base, improving overall user experience and functionality
- Enhanced code quality through GitHub contribution
- Collaborated with the product manager, and customer success team.

### JavaScript Development Intern | [WunderBytes](#)

NOV 2021 - JAN 2022, BUDAPEST, HUNGARY (REMOTE)

- Enhanced data presentation by implementing an interactive heat map visualization on the client's website using the React.js framework
- Advanced proficiency in JavaScript programming language through dedicated study and practical application

## EDUCATION

### BrainStation | Diploma, Software Engineering

JUNE 2024 - AUG 2024, VANCOUVER, BC

### Budapest University of Technology and Economics |

### Bachelors in Engineering Management, Minor Product Management

SEP 2019 - JULY 2023, BUDAPEST, HUNGARY

## PROJECTS

### Lead Developer | [ScamShield](#) | AUG 2024, BRAINSTATION CAPSTONE

- Developed an advanced machine learning tool using React and Node.js for integration into messaging platforms, detecting potential scam messages and alerting users to enhance security and protect personal information.

### Lead Developer | [Learnify](#) | AUG 2024, BRAINSTATION x MICROSOFT

- Developed an AI learning playground with React.js and Node.js, featuring an interactive chatbot and animated explanations to educate users on AI systems.

### Founder and Developer | [FinanceFirst](#) | JAN 2021 - PRESENT

- Developed a personal finance tracker application with multi-currency support using React.js, Node.js, Express.js, AWS Lambda, MySQL, and DynamoDB. Continuously enhancing features and fixing bugs.
